Updates and other software

What apps would you like to install to start with?

☒ Normal installation

Web browser, utilities, office software, games, and media players.

☐ Minimal installation

Web browser and basic utilities.

Other options

☐ Download updates while installing Ubuntu

This saves time after installation.

☐ Install third-party software for graphics and Wi-Fi hardware and additional media formats

This software is subject to license terms included with its documentation. Some is proprietary.

Quit

Back

Continue

Installation type

This computer currently has Windows Boot Manager on it. What would you like to do?

- ☐ Install Ubuntu alongside Windows Boot Manager
Documents, music, and other personal files will be kept. You can choose which operating system you want each time the computer starts up.
 - ☐ Erase disk and install Ubuntu
Warning: This will delete all your programs, documents, photos, music, and any other files in all operating systems.
 - ☐ Encrypt the new Ubuntu installation for security
You will choose a security key in the next step.
 - ☐ Use LVM with the new Ubuntu installation
This will set up Logical Volume Management. It allows taking snapshots and easier partition resizing.
-
- ☒ Something else
You can create or resize partitions yourself, or choose multiple partitions for Ubuntu.

Write the changes to disks?

If you continue, the changes listed below will be written to the disks. Otherwise, you will be able to make further changes manually.

The partition tables of the following devices are changed:
/dev/nvme0n1

The following partitions are going to be formatted:
partition #6 of /dev/nvme0n1 as swap
partition #7 of /dev/nvme0n1 as ext4
